

PRECIMECA

MANUFACTURING
AND MAINTENANCE
OF SCRAP TYRE
SHREDDERS

PRECIMECA EXPERTISE

- Stationary and mobile rotary shears
- Primary and secondary shredders
- Wear parts (knives, rotors...)
- Disc screen classifiers
- Turnkey plants with conveyors, magnetic separation, ...

APPLICATIONS

- Several output sizes (<20, 50, 100, >150 mm....)
- Alternative Fuel (TDF)
- Civil engineering (TDA)
- Volume reduction
- Granulation/Micronisation
- Pyrolysis

OUR ADDED VALUE

- Clean cut during the whole life time of knives
- Shredding of Truck, Passenger car, Agrarian tyres
- Integrated manufacturing (design, machining, welding, assembly...)
- In-depth knowledge of constraints and key success factors of the ELT market
- Recognised know-how and successful track records with many references

MAINTENANCE/SERVICE

- Design & Engineering Office
- Electrical cabinets, 4.0 Man Machine Interface, weighing systems
- Upgrade of hydraulic to electric transmission
- Improvement of wear parts life time
- Design aimed at minimising service constraints
- Optimisation of customers process

OUR EXPERTISE, BASED ON OVER 40 YEARS PARTNERSHIPS WITH OUR CUSTOMERS IS THE OPPORTUNITY TO ENHANCE THEIR EQUIPMENT

Design & Engineering Office

Electrical cabinets, 4.0 Man Machine Interface, weighing systems

Upgrade of hydraulic to electric transmission

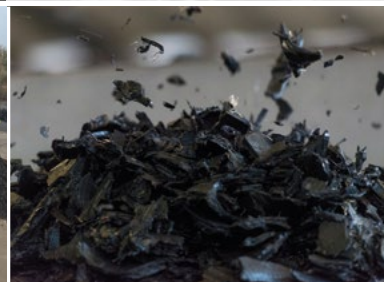

Improvement of wear parts life time

Design aimed at minimising service constraints

Optimisation of customers process
